Hetzer and Associates Announces Representation of Common Fibers

Adds Carbon Fiber Composites and Manufacturing to Its Offering

KIRKLAND, Washington – Hetzer and Associates LLC, representatives for component suppliers and OEMs in the US, today announces its latest representative agreement with Common Fibers, worldwide design-developers of carbon fiber components spanning industries from aerospace and defense to consumer products. This new arrangement complements H&A's range of services and core competencies while helping Common Fibers to expand its footprint and entry into more diverse markets.

"We are excited to be working with this talented team of engineers and technicians dedicated to the technologies that are transforming the way we think of component parts and new product builds, said H&A founder, Lori Hetzer. They have already quoted on several of our client initiatives quickly and efficiently. Common Fibers will be a reliable, trusted ally in quality production for our forward-thinking, visionary clients."

"From our first meeting with Lori, we knew we had a partner that was as passionate as we are about providing innovative products to progressive-minded industries," remarked Ann Mountjoy, co-founder of Common Fibers. "She brings the same dedication and personal touch to formulating business arrangements that we have found assure success and satisfied, repeat customers."

About Hetzer and Associates

Hetzer and Associates excels in linking proven manufacturing partners with OEMs primarily in high-tech industries. The company's multi-certified suppliers offer comprehensive capabilities, from vision to prototyping to production and delivery, with a human element that improves communication and creates meaningful working relationships that last. www.hetzerandassociates.com

About Common Fibers

Common Fibers is a vertically integrated, build-to-spec manufacturer, with a laser focus on DFM, quality and repeatability. Serving industries from consumer goods to aerospace, the entire development process is closely controlled and contained under one roof, guaranteeing smooth and painless production cycles from inception to delivery. Producing small intricate parts to full scale structures, Common Fibers has the experience, expertise and resources needed to provide the finest quality carbon fiber components for the most demanding initiatives. www.commonfibers.com
